# Wireless Cardio Monitoring Shirt

- Successful NASA-funded project
- Develop wearable, reusable garment-based physiological sensors
- Will be featured in NASA's upcoming SBIR success stories

## NOVEL BENEFITS

- Reliable, consistent EKG
- Typical 12-lead EKG output
- Non-invasive cardiac monitoring
- No connecting wires
- Ideal for athletics
- On-site, broad spectrum stress tests
- Reusable, washable sensors
- Gel or adhesives *not* required
- Easy-to-use
- Remote triage-compatible
- Can also be used for medical patients, soldiers and first responders
